KENWOOD Viking P25 PORTFOLIO

Built For Mission-Critical Communications

KENWOOD Viking P25 radios are engineered for public safety and critical operations where reliability, clarity, and interoperability are essential. Designed to perform in demanding environments, Viking radios deliver dependable communication when it matters most.

Why Choose Viking?

P25 Phase 1 & Phase 2 Compliant

Seamless interoperability across agencies and systems.

Clear, Reliable Audio

Advanced audio processing for clarity in high-noise environments.

Secure Communications

Support for encryption and advanced signaling features.

Rugged, Field-Ready Design

Built to withstand harsh conditions and daily use.

Scalable for Growing Systems

Portable, mobile, and system options designed to evolve with your operation.

Local Expertise & Support

Backed by system design, programming, service, and support from J&K Communications.

Viking Portable Radios

Mission-Critical P25 Portable Radios

Viking VP5000

Compact, rugged P25 portable radio designed for mission-critical public safety operations. The VP5000 delivers clear audio, reliable performance, and flexible system compatibility in a durable, easy-to-use design.

Key Features

- **P25 Phase 1 & Phase 2** compliant with analog operation for mixed-system environments
- **Clear, loud audio performance** designed for use in high-noise conditions
- **Rugged, field-ready construction** built to withstand daily public safety use
- **Secure communications support** including encryption and advanced signaling
- **GPS and Bluetooth® capability** for location awareness and accessory connectivity
- **Flexible channel and zone capacity** to support complex system requirements

Best for: Law enforcement, fire, EMS, and utility operations.

Viking Portable Radios

Mission-Critical P25 Portable Radios

Viking VP8000

High-performance, multi-band P25 portable radio engineered for mission-critical public safety operations. The VP8000 delivers exceptional audio clarity, advanced feature support, and maximum interoperability in a rugged, field-proven design.

Key Features

- **P25 Phase 1 & Phase 2 compliant** with multi-band operation for broad system coverage
- **Exceptional, clear audio performance** optimized for high-noise and high-stress environments
- **Rugged, mission-ready construction** built for frontline public safety use
- **Advanced secure communications support** including encryption and signaling features
- **GPS and Bluetooth® capability** for location awareness and accessory connectivity
- **Expanded channel and zone capacity** designed for complex, multi-agency systems

Best for: Law enforcement, fire, EMS, and public safety operations.

Viking VP8000

Advanced Capabilities

The Viking VP8000 is built for agencies that demand maximum flexibility, coverage, and performance. Multi-band capability, advanced connectivity, and enterprise-level security deliver reliable communications in complex, mission-critical environments.

Multi-Band Flexibility

- Available in **single-band, dual-band, and tri-band configurations**
- Supports **VHF, UHF, and 700/800 MHz**
- Ideal for **mutual aid and multi-agency interoperability**

Dual Full-Color Displays

- **Front and top color screens** for quick status viewing
- Clear visibility in **low-light and high-glare environments**
- Simplifies operation during critical incidents

Rugged, Mission-Ready Design

- **IP68 waterproof and dustproof**
- Built to **MIL-STD durability standards**
- Designed for **daily frontline use in harsh conditions**

Advanced Audio Performance

- High-output speaker for **loud, clear audio**
- Optimized for **high-noise environments**
- Compatible with **TrueVoice™ noise cancellation**

Enterprise-Level Security

- Supports **AES encryption (FIPS-capable options)**
- Secure P25 communications
- Advanced signaling and authentication options

Integrated Connectivity

- **Bluetooth®** for wireless accessories
- **Wi-Fi** for programming and updates
- Optional **GPS** for location tracking and dispatch visibility

Efficient System Performance

- **P25 Phase 1 & Phase 2 (TDMA)**
- Supports **high channel and zone capacity**
- Designed for **large and growing systems**

Viking Portable Accessories

Customize Your Radio for the Mission

Viking portable radios are supported by a full range of accessories designed to enhance communication, improve safety, and maximize field performance. From audio and power to carry solutions, Viking accessories help teams operate efficiently in any environment.

Audio Accessories

- Remote speaker microphones
- Surveillance and covert earpieces
- Heavy-duty field microphones
- Noise-reduction headsets

Power Solutions

- Standard and high-capacity lithium-ion batteries
- Single-unit and multi-unit chargers
- Rapid and vehicle charging options

Carry & Protection

- Durable belt clips and holsters
- Leather and nylon carry cases
- Rugged protective options for daily field use

Antennas & Connectivity

- VHF, UHF, and multi-band antenna options
- GPS-enabled configurations for location services
- Accessory interface compatibility for expanded capability

Compatible with Viking VP5000 and VP8000 portable radios

Viking Accessories

TrueVoice™ Noise Cancellation

Intelligent Noise Cancellation

TrueVoice™ is advanced, software-based noise cancellation built into Viking radios to deliver clear, intelligible voice in the most challenging environments. By automatically identifying and reducing background noise, TrueVoice improves communication clarity without the need for special accessories or manual adjustments.

How TrueVoice Works

1. Identifies noise sources

Analyzes common background noise such as sirens, engines, wind, and machinery.

2. Separates voice from noise

Advanced processing isolates human speech from surrounding sound.

3. Transmits only the voice

Reduces unwanted noise so dispatch and field personnel hear clear communication.

Available on select Viking portable and mobile radios

Viking Mobile Radios

Mission-Critical P25 Mobile Radios

Viking VM5000

Reliable P25 mobile radio for everyday mission-critical, in-vehicle communications. The VM5000 delivers clear audio, dependable system performance, and straightforward installation for public safety fleets requiring a proven, cost-effective mobile solution.

Key Features

- **P25 Phase 1 & Phase 2 compliant** with analog operation for mixed-system environments
- **Clear, high-power audio performance** optimized for noisy vehicle conditions
- **Rugged, field-proven construction** designed for continuous in-vehicle use
- **Secure communications support** including encryption and advanced signaling
- **Flexible control head and mounting options** for diverse vehicle installations
- **Scalable channel and zone capacity** to support evolving system requirements

Best for: Single-agency fleets, patrol vehicles, utilities, and standard mobile installations.

Viking Mobile Radios

Mission-Critical P25 Mobile Radios

Viking VM7000

High-performance P25 mobile radio built for complex, high-demand environments. The VM7000 delivers modular multi-band capability, advanced control flexibility, and enterprise-level performance for large, regional, and multi-agency operations.

Key Features

- **P25 Phase 1 & Phase 2 compliant** with analog, DMR, and NEXEDGE® operation
- **Modular multi-deck architecture** for expandable multi-band operation
- **Independent audio for each RF deck** (dedicated speaker per band)
- Configurable for **single-band, dual-band, or tri-band** operation
- **Maximum installation and control flexibility** for complex vehicle and command configurations
- **High channel and zone capacity** for large, regional, and enterprise systems

Best for: Regional systems, high-density fleets, command units, and enterprise public safety networks.

Viking Mobile Radios

Mission-Critical P25 Mobile Radios

Viking VM8000

Flagship all-in-one, multi-band P25 mobile radio designed for demanding multi-agency and regional public safety systems. The VM8000 delivers maximum interoperability, system capacity, and control flexibility in a single integrated platform for mission-critical operations.

Key Features

- **P25 Phase 1 & Phase 2 compliant** with analog operation for mixed-system environments
- **Enhanced, high-power audio performance** optimized for high-noise vehicle conditions
- **Rugged, mission-ready construction** built for continuous in-vehicle operation
- **Secure communications support** including encryption and advanced signaling
- **All-in-One Multi-Band Design**
 - Integrated single-band, dual-band, or tri-band operation
 - No external RF decks required
 - Simplified installation and reduced vehicle space requirements
- **Multi-Protocol Interoperability**
 - Supports P25, DMR, and NEXEDGE®
 - Enables interoperability across system types

Best for: Law enforcement, fire, EMS, utilities, and multi-agency fleet operations.

Viking VM8000

Viking VM8000

Advanced Capabilities

The Viking VM8000 delivers maximum flexibility, control, and performance for complex communications environments. Multi-band capability, advanced features, and enterprise-level connectivity come together in a rugged, field-proven mobile radio.

Advanced Control Interface

- **Full-color display** for clear status and channel visibility
- D-pad navigation with programmable function keys
- Dedicated channel and volume control knobs

Multi-Band Flexibility

- Available in single-band, dual-band, and tri-band configurations
- Tri-band models support **P25 and DMR interoperability**
- Ideal for regional systems, mutual aid, and multi-agency operations

Rugged, Mission-Ready Design

- Fully ruggedized for public safety and fleet environments
- Built for continuous, in-vehicle operation
- Reliable performance in extreme temperatures and harsh conditions

Advanced Security

- DES-OFB multi-key encryption support
- Optional **AES FIPS-validated encryption**
- ARC (ADP compatible) capability
- Secure P25 communications for sensitive operations

Integrated Connectivity

- Bluetooth® for wireless accessories
- Wi-Fi for programming and firmware updates
- Optional GPS for location tracking and dispatch visibility

System Performance

- P25 Phase 1 & Phase 2 (TDMA) operation
- High channel and zone capacity
- Designed for large, high-density, and enterprise systems

Which Viking Radio Is Right for You?

A Simple Guide to Choosing the Right P25 Solution

Viking P25 radios are designed to meet different operational needs—from everyday public safety use to complex, multi-agency systems. Use the guide below to quickly identify the best fit for your operation.

Viking Portable Radios

| Model | Best For | Key Advantage |
|---------------|--|--|
| VP5000 | Growing agencies and expanding systems | Proven, reliable performance |
| VP8000 | Multi-agency and regional systems | Maximum interoperability and performance |

* All Viking portable radios support P25 Phase 1 & Phase 2 operation, secure communications, and rugged field-ready design.

Viking Mobile Radios

| Model | Best For | Key Advantage |
|---------------|--|--|
| VM5000 | Standard fleet vehicles | Proven, reliable mobile performance |
| VM7000 | Regional systems and enterprise fleets | Advanced control, scalability, and performance |
| VM8000 | Multi-band, multi-agency operations | Multi-band capability and system scalability |

* Viking mobile radios are engineered for clear audio, secure communications, and dependable in-vehicle operation.

How to Choose

- **VM5000** — Standard fleet operations
- **VP5000** — Growing or expanding systems
- **VM7000** — Regional or multi-agency systems systems
- **VP8000/VM8000** — Multi-band or mission-critical environments

Talk with J&K Communications about your operational requirements.

Why J&K Communications ?

Local expertise. Proven P25 solutions. Long-term support.

J&K Communications has supported public safety and critical operations for decades, delivering reliable P25 communication solutions tailored to each agency's needs. From system design and installation to programming, service, and ongoing support, J&K is committed to keeping teams connected when it matters most.

What Sets J&K Apart:

- ✓ Local, experienced P25 specialists
- ✓ System design and deployment expertise
- ✓ In-house programming and installation
- ✓ Long-term service and technical support
- ✓ Proven experience supporting public safety and utility operations

Talk with J&K Communications about designing a P25 solution that fits your operation.
